

## **Position: Mechanical Technician**

UltraCell is a global leader in research, development, and production of fuel cell systems for portable power applications. UltraCell was founded in 2002 to commercialize advanced micro fuel cell technology invented by Lawrence Livermore National Laboratory. In 2011, UltraCell became a wholly owned subsidiary of Bren-Tronics, Inc. UltraCell fuel cell systems are compact and light weight. They have undergone extensive Military Specification qualification testing and field trials.

Address: 5637 La Ribera Street, Suite A, Livermore, California 94550

UltraCell has an immediate opening for a mechanical technician. The main responsibility of the electrical technician is to assemble and test fuel cell components and subsystems.

### **Key Duties**

- Modifies and assembles small pumps and air compressors
- Assembles mechanical components using hand and power tools
- Tests fuel cell components
- Maintains thorough records of fuel cell components
- Promptly reports production issues

### **Requirements**

- US Citizenship
- Associates degree in mechanical engineering or related fields
- 1 – 3 years of experience in assembling and testing mechanical components
- Hands-on experience with shop machining such as milling machine, lathes, bench drill presses, band saws, etc.
- Ability to read schematics
- Ability to follow work instructions
- Ability to have a flexible schedule
- Good communication skills
- Attention to detail
